About this Report

This report provides summary information about you compared to the other students enrolled in the same course. This report can help you see how much you're using a course compared to your peers, and also see your grade compared to your peers.

	Important: your total score, and the average score of your peers, may differ from the official grade your instructor maintains and reports to your school. Contact your instructor for more information about what this total score means in the context of your course.
---	---

Using the Report

The **Your Total Activity Compared to the Course Average** section displays various measures that compare you to the average of other students in the course. The following icons display a summary of this comparison:

Icon	Meaning
	You are above the average of the other students in your course.
	You are below the average of the other students in your course.
	You are equal to the average of the other students in your course.

The following measures are displayed:

- **Course Accesses:** The number of times you've accessed the courses, compared to the average of the other students in the course.
- **Time in Course (Min.):** The total amount of time you've spent in the course to date (in minutes) compared to the average of the other students in the course.
- **Interactions:** The total number of actions you've initiated in the course, compared to the average of the other students in the course. Many types of actions can lead to an interaction being recorded, such as when you accessing a course item, submitting a discussion forum post, etc.
- **Submissions:** The total number of Assignment, Blog, Discussion, Journal, Safe Assignment, Survey, and Test submissions you've made in the course compared to the average of the other students in the course.
- **Grade Center Total Score:** The total score recorded by your instructor for this course

compared to the average of the other students in the course.

Below this section are four comparative line charts that show your activity compared to the average activity for the other students in the course, over time. Activity is grouped by week.

- **Your Course Accesses vs. Avg:** displays your total number of course accesses compared to the average of the other students in the course.
- **Your Submissions vs. Avg:** displays your total number of Assignment, Blog, Discussion, Journal, Safe Assignment, Survey, and Test compared to the average of the other students in the course.
- **Your Interactions vs. Avg:** displays your total number of interactions compared to the average of the other students in the course. Many types of actions can lead to an interaction being recorded, such as when you accessing a course item, submitting a discussion forum post, etc.
- **Your Minutes vs. Avg:** displays your total number of course accesses compared to the average of the other students in the course.
