

Configuring Apple Devices and Macs for SUsmail

Instructions for Configuring SUsmail to work with Apple Devices. Apple Mail is a built-in application on Macs (including Macbook Pros and Mac Airs) and iPads. You can configure multiple accounts, including your SUsmail account, to work with Apple Mail.

Note: SU recommends that anyone with Mac OSX 10.5 (Leopard) upgrade to a newer Mac OS to obtain critical security patches from Apple.

- [Apple Mail on Sierra \(OSX 10.12\)](#)
- [Apple Mail on Mavericks \(10.9\) thru El Capitan \(10.11\)](#)
- [Apple Mail on Snow Leopard](#)
- [Apple Mail on Lion and Mountain Lion](#)
- [iPad or iPhone or iPod Touch](#)
