Turn on Automatic Updates in Windows 10

By default Windows 10 will update your computer automatically. Use the instructions below to ensure this is occurring.

**Step 1: Open Windows Update Settings**

Using the Windows 10 search bar in the bottom left search "Windows Update Settings" and select the systems settings link that populates.

**Step 2: Select Automatic Updates**

Once in Windows Update Settings select "Advanced Options".
Ensure that Automatic is selected in the drop down. You can now close the settings window.

Choose how updates are installed

- Automatic (recommended)

Keep everything running smoothly. We’ll restart your device automatically when you’re not using it. Updates won’t download over a metered connection (where charges may apply).

- Give me updates for other Microsoft products when I update Windows.
