

# Residence Hall Networking

Once connected, students can: Students who live in Syracuse University residential facilities on North and South campuses can connect to the Internet either through SU's wired (Ethernet) network or through the wireless AirOrangeX network.

- Send and receive e-mail
- Use Instant Messenger
- Access the SU Web site and SU Web-based services, such as MySlice and Blackboard
- Access the World Wide Web
- Participate in the online gaming community
- Access personal Web pages and files stored on the SU network
- Connect to SU Library resources

In order to connect to the University's network, students must have activated their [NetID](#) and created a NetID password. In addition, Syracuse University requires all computers connected to the University's wired or wireless network ([AirOrangeX](#)) to be protected by a current version of antivirus software. Further information is located on the ITS [antivirus](#) web page. Students will receive instructions on how to register their computers on the SU network when they check into their residential facility.
