Connecting to Terminal Server from a Windows 10 computer

Process for Connecting to Terminal Server

Press the Windows button in the lower-right of the screen.

Type "mstsc" (without the quotes).

Click "Remote Desktop Connection" from the top of the start menu.

In the Remote Desktop Connection select the "Show Options" button.

In the Logon settings of the expanded window enter

  **Computer:** ts.syr.edu

  **User name:** ad\netid

Where NetID is your NetID. Your NetID is the part of your email address to the left of the @ symbol.

Press "Connect".
You'll be prompted to enter your credentials. Enter your NetID password.

Press OK and you be logged into Terminal Server. It looks like a Windows 7 desktop.
