Overview

Frevvo is a forms and flows application available to Faculty and Staff at Syracuse University. It is intended for **simple, single-use** forms and flows, and basic data collection. See below if you believe you have a process that would be considered complex.

Advanced Forms and Flows

Frevvo is not built to handle or work with enterprise data or highly complex flows. If you have a form and/or flow that is more complicated, please contact us so that we may be able to provide better solutions by sending an email to help@syr.edu

Requesting Access

In order to create forms in Frevvo, the administrators need to grant special access. To request access, email a request to help@syr.edu

Frevvo v9 - Help & How To
