

Creating A New Form

Table of Contents

- [Overview](#)
- [How To](#)

Overview

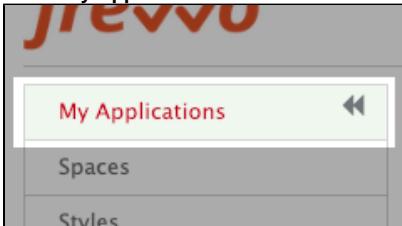

Within Frevvo, forms can be created and used for data collection of a variety of purposes. That data can then be used however deemed fit. Follow the steps below to create a new form.

To create forms and applications, you must have an account in Frevvo with the Designer role!

How To

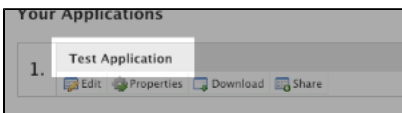

1. Log into Frevvo
2. Select **My Applications** from the menu on the left

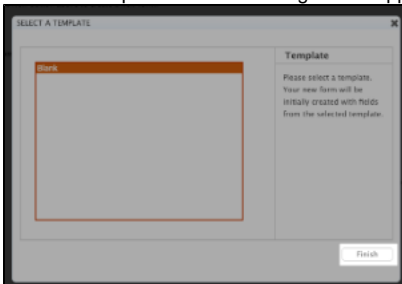

3. Select the Application where the form will exist

All forms must exist in an application! If there are no applications yet created or a new one is desired, follow the process on [Creating A New Application](#).

4. Select **+ New** to the right of "ApplicationName :: Forms"
5. From the template selection dialogue that appears, select **Finish**

- a. If a template is desired, select a template first, then select **Finish**
6. This will finish creating the form within the application, and bring you to the form editor.

Additional information on the different controls and their use can be found at: <https://docs.frevvo.com/d/display/frevvo74/Palette+Controls>
