

# Getting Started and Using vLab

The ITELL virtual infrastructure is composed of ~40 servers that are provisioned as virtual machines for students as resources for laboratory procedures. Students are able to access these virtual machines for their IST labs and various resources by using the HTML-5 Vsphere Web Client. With our new upgrades, access to Student VMs is streamlined for a simple web browser login.

Navigate to [vlab.ischool.syr.edu](http://vlab.ischool.syr.edu) to explore any of your VMs.
