Socially-Distanced Student Capacity - 23

Video Walk-through

Camera/Mic Troubleshooting

For troubleshooting the Camera and/or Microphone in common recording applications such as Microsoft Teams, Blackboard Collaborate, Zoom AND Browsers (Chrome, Firefox, Edge) Navigate Here - - > Enable Camera/Mic on Windows - (Teams, Zoom, Collaborate)

ITS Classroom Technology Guide Fall 2020

ITS Classroom Technology Guide Fall 2020 Semester & Fall 2020 Semester

The teaching workstation consists of multiple parts which allow you to control the classroom. The teaching workstation sits on wheels allowing it to be mobile.

In the picture above, you will see the following:

- **Extron Control Panel**: Allows you to control the monitors, inputs, lights, and cameras
- **External Inputs**: Allows you to connect a laptop or other device using VGA, HDMI, or Ethernet
- **Wireless Mouse**: Allows you to control presentations wirelessly
- **Wacom Touch Screen**: Contains a stylus that allows you to easily annotate presentations and other materials

Extron System Settings

Extron System Main Page

Note: When "System Off" is selected the classroom takes approximately two minutes to shut down everything and then reboot for operation.

Main Display Controls

- **Power**: Main power controls for the TV displays at the front of the room.
- **Main Display Settings**: The options here are PC Monitor 1, PC Monitor 2 (or extended display), and HDMI. Touch any of these while highlighting your desired display above (Left/Right) to change.

By touching this option, the display/volume settings currently selected will be pushed TO ALL other display settings on this Extron system.

If video is not outputting and you have consulted the above options, make sure video mute is NOT highlighted.

Volume Settings

- **Main Volume Settings**: Up and Down arrows will raise volume for the speakers throughout the classroom.

If audio is not outputting, make sure mute is NOT highlighted.

Teaching Station Controls

- **System Utilities**: Select this option to open up the following display.

Extron System Teaching Station Settings

Similar to the above display options, these will change the output of the monitors on the teaching station relative to the highlighted option.

COVID-19 Classroom Accommodations

Each classroom in Hinds Hall is now equipped with additional technology for professor & students. The technology, which includes **Cameras** for video recording, **Headset Docks** to support faculty deployed headsets, etc. servers to facilitate proper practices in the classroom while adhering to COVID-19 guidelines.

The following documentation will highlight features and controls for the new tech, as well as explaining its functionality from room to room in Hinds Hall.

Wireless Headset

Wireless Headset

On the teaching station, you will find an example of a headset dock ready for pairing with your personal wireless headset for virtual classroom uses. In the picture below, you will see a headset dock and a headset located at the front of the room.

Headset Dock
