For troubleshooting the Camera and/or Microphone in common recording applications such as Microsoft Teams, Blackboard Collaborate, Zoom AND Browsers (Chrome, Firefox, Edge)

Navigate Here - - > Enable Camera/Mic on Windows - (Teams, Zoom, Collaborate)

ITS Classroom Technology Guide Fall 2020

Classroom Technology Guide – Fall 2020 Semester

Teaching Workstation

The teaching workstation consists of multiple parts which allow you to control the classroom. The teaching workstation sits on wheels allowing it to be mobile.

In the picture above, you will see the following:

- Extron Control Panel: Allows you to control the monitors, inputs, lights, and cameras
- External Inputs: Allows you to connect a laptop or other device using VGA, HDMI, or Ethernet
- Wireless Mouse: Allows you to control presentations wirelessly
- Wacom Touch Screen: Contains a stylus that allows you to easily annotate presentations and other materials

Extron Touch Control Panel

Extron System Main Page

Note: When "System Off" is selected the classroom takes approximately two minutes to shut down everything and then reboot for operation.

Main Display Controls

Main power controls for the TV displays at the front of the room.

Main Display Settings

The options here are PC Monitor 1, VGA, and HDMI. Touch any of these while highlighting your desired display above (Left/Right) to change.

To ALL

By touching this option, the display/volume settings currently selected will be pushed TO ALL other display settings on this Extron system.

If video is not outputting and you have consulted the above options, make sure video mute is NOT highlighted.

Volume Settings

Main Volume Settings

Up and Down arrows will raise volume for the speakers throughout the classroom.

If audio is not outputting, make sure mute is NOT highlighted.

Teaching Station Controls

System Utilities

Select this option to open up the following display.

Extron System Teaching Station Settings

Teaching Station Monitor

Similar to the above display options, these will change the output of the monitors on the teaching station relative to the highlighted option.

COVID-19 Classroom Accommodations

COVID-19 Classroom Accommodations

Each classroom in Hinds Hall is now equipped with additional technology for professor & students. The technology; which includes Cameras for video recording, Headset Docks to support faculty deployed headsets, etc. servers to facilitate proper practices in the classroom while adhering to COVID-19 guidelines.

The following documentation will highlight features and controls for the new tech, as well as explaining its functionality from room to room in Hinds Hall.

Wireless Headset

On the teaching station, you will find a headset dock ready for pairing with your personal wireless headset for virtual classroom uses. In the picture below, you will see an example of a headset dock and a headset located at the front of the room.

To ensure that your headset successfully pairs with the headset dock, connect the headset to the dock, as seen in the image below, and wait until you hear a beep come from the headset dock and then confirm the headset icon located on the side of the dock is solid white (see image below and no. 5 located in Headset Components).
