Download and Install Microsoft Remote Desktop for Mac in the Apple App Store

Before You Begin - MacOS Important Information

Please note: There are currently two version of Microsoft Remote Desktop available in the Apple App Store. Whitman recommends using [Microsoft Remote Desktop 10](#), the newest version.

1. Visit <https://itunes.apple.com/us/app/microsoft-remote-desktop-10/id1295203466?mt=12>, the Apple App Store preview page for Microsoft Remote Desktop 10

2. Click on 'View In Mac App Store'

 Unknown Attachment

3. On The App Store page for Microsoft Remote Desktop 10, click on "Get":

 Unknown Attachment

4. Click on "Install App":

 Unknown Attachment

5. Once the application is installed, click "Open". You should see a window that looks like this:

 Unknown Attachment

6. With the app open, locate the dock icon for Microsoft Remote Desktop (It will be circular and look like the one above in steps 2,3, and 4), right click it, and select "Keep in Dock" so that the application is easy for you to find later on. Proceed to "Configure Microsoft Remote Desktop"

Configure Microsoft Remote Desktop

1. Open Microsoft Remote Desktop for Mac, if it isn't already. You should see the main Microsoft Remote Desktop app window. In the upper menu you should see a button which looks like a gear, with a down arrow on it:

 Unknown Attachment

2. Click the arrow, then click Preferences, as shown:

 Unknown Attachment

3. In the Preferences pane, click the tab on the top which says "User Accounts":

 Unknown Attachment

4. In the lower left corner, click the "+" sign to add an account.

5. Enter your information as shown (Your username should follow the **AD\netID** format as shown below, your password is your NetID Password. The Friendly name is used to help identify what the password is associated with):

 Unknown Attachment

6. Click 'Save', and then close the Preferences pane.
7. Back at the main window, to the right of the gear button is a button with a "+" sign and a down arrow. Click that, then click "Desktops" as shown:

? Unknown Attachment

8. In the PC name and Friendly name Field, type the hostname of your specific Virtual Machine, and under User account select your Whitman Credentials:

? Unknown Attachment

9. You may also set up folder redirection by clicking the Folders tab and checking the Redirect Folders box. After doing so, click the "+" sign at the bottom left of the window :

? Unknown Attachment

Browse for any folder you would like to redirect and select Open:

? Unknown Attachment

When finished, click Add to save your information.

10. You should now be back to the main Window. At the top, there are two buttons in the center of the screen: Desktops, and Feeds. Make sure you click on Desktops to see the list of connections available to you. You should now see the Virtual Machine that you have just setup.

Connecting to your Virtual Machine

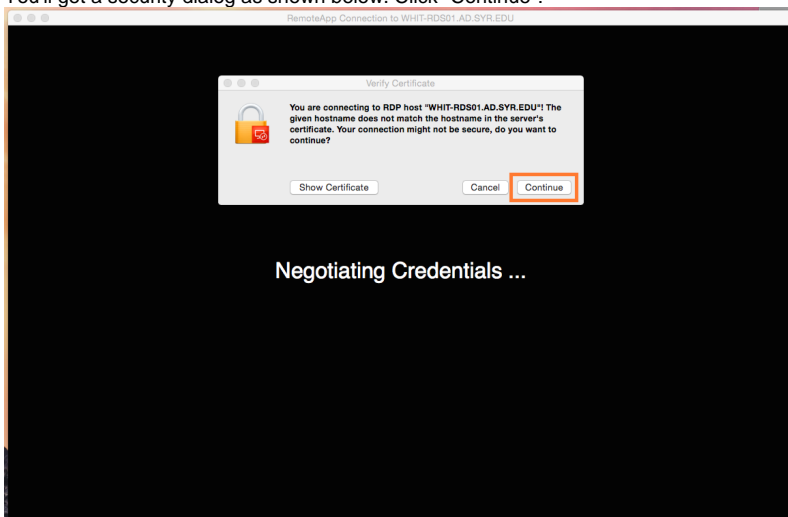

Before You Begin

It's important to note that, before you begin, you must connect your computer to the SU VPN.

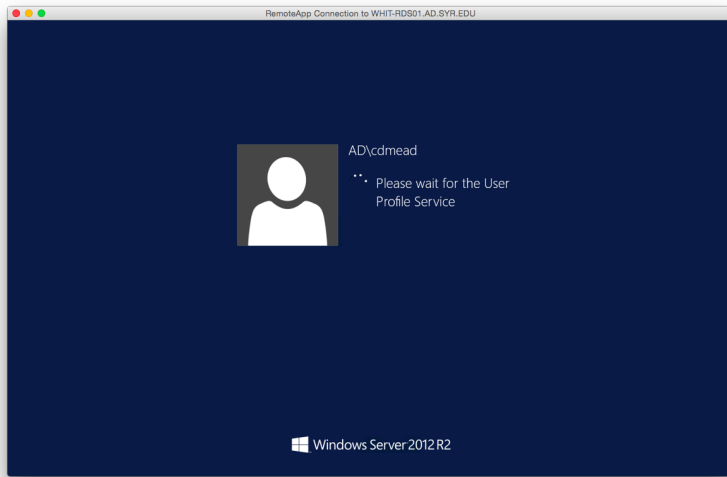

1. After you've connected to the SU VPN, double click on your Virtual Machine and you'll see a black window up showing the following dialogs:

2. You'll get a security dialog as shown below. Click "Continue":

3. You will then see a window similar to a Windows login splash screen:

4. Finally, your desktop session will run.

5. When you're done, simply close your app and disconnect from the SU VPN.
