

Creating A New Form - v10

Table of Contents

- [Overview](#)
- [How To](#)

Overview

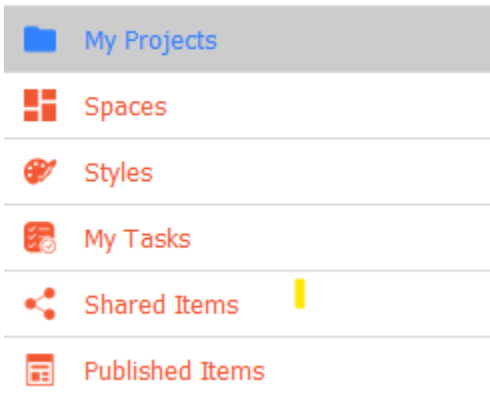

Within Frevvo, forms can be created and used for data collection of a variety of purposes. That data can then be used however deemed fit. Follow the steps below to create a new form.

To create forms and projects, you must have an account in Frevvo with the Designer role!

How To

1. Log into Frevvo
2. Select **My Projects** from the menu on the left

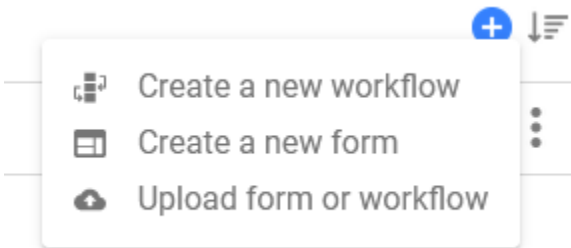

3. Select the Application where the form will exist

All forms must exist in an Project! If there are no projects yet created or a new one is desired, follow the process on [Creating A New Project](#).

4. Select **+** to the right of "Project Name :: Forms and Workflows"

- 5.
6. Once you have your form created with the appropriate items from the Palette click on **Submit**.

Additional information on the different controls and their use can be found at: <https://www.frevvo.com/video-quick-start-form-design>
