

View the Activity or Statistics of the project

Orange Tracker has views to display the current activity and statistics for each project. The Activity screen will show the user what issues are actively being worked, like who is creating new issues, adding comments, and closing issue tickets. The Statistics screen displays many common filters to organize your issues tickets and helps the user understand key elements.

To view these screens, first select the project from the Projects pull-down. Once you are in the project, click on the Project Name near the top:

After the page loads, you should see the Activity screen. To see the Statistics screen, use the Switch View button to the right of the Activity title:

This will bring you to the Statistics screen:

The screenshot shows the Statistics screen of the Orange Tracker application. The top navigation bar includes a hamburger menu icon, the 'Ot' logo, and dropdown menus for 'Dashboards', 'Projects', 'Issues', 'Tempo', 'Boards', 'Emails', 'User Management', and 'Create'. A 'Search' button is located on the right side of the navigation bar. Below the navigation bar, the page title is 'SYRACUSE UNIVERSITY | Orange Tracker'. A project selection dropdown is visible, showing the 'AASC Systems' project with its logo and the text 'AASC Systems' and 'AASC SYS'. The main content area is titled 'Statistics' and includes a 'Switch view' button. The page displays various filters and data tables for the project.
