

Unable to select multiple publish destinations in Cascade

Overview

When publishing an asset or folder, you may encounter an issue where you are not able to select and unselect the appropriate *destinations*.

 Be sure that you are using the Publish button in the top right, NOT the one below the

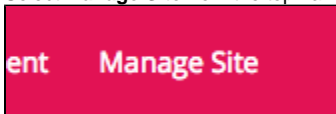

Diagnosis

This is caused by disabled *destinations*. If a *destination* is disabled, it will not show in the *destinations* publish prompt.

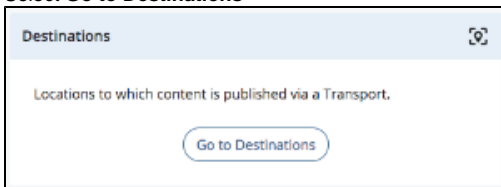

Steps To Fix

Enable appropriate destinations within the desired site.

1. Navigate to the appropriate site
2. Select **Manage Site** from the top navigation bar

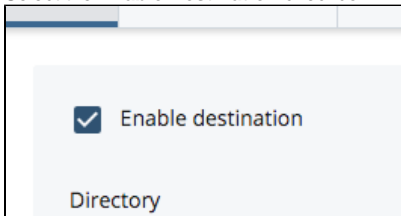

3. Select **Go to Destinations**

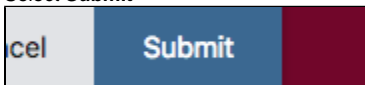

4. Select the appropriate destination(s) to bring up the destination's settings
5. Select **Edit** in the top right

6. Select the **Enable Destination** checkbox

7. Select **Submit**

After the steps are completed, you will now be able to select that particular destination when publishing.
