

Save and Share Zoom Recordings

Zoom recordings that are saved to Zoom Cloud will automatically push to Kaltura MediaSpace. Professors can then share these recordings in their Blackboard class through the LTI.

Save and Share Zoom Recordings in the Cloud

1. In your Zoom session, you can either save your Recording to the Cloud or Download it directly to your device.

2. If you save the recording to your cloud storage, when you are done with your online session, you can go into your account (zoom.syr.edu) and download it to your device.

3. Once you are in the Recorded screen, you can find your session recording and select the first option, Shared screen with speaker view, this file includes the audio and video as an MP4. Select the download icon.

4. By default, your video should save to your Downloads folder.

| Name | Size | Kind | Date Add |
|---|--------|--------------|----------|
